ABOUT SHOBHIT UNIVERSITY

Shobhit University believes in strategic growth as envisaged in our mission and vision, to impart quality education through vertical and horizontal integration. It strives to become a world class university, with a global perspective, that educates the future leaders of the world. Therefore, the challenge before the University is to remain in the forefront of cutting edge knowledge and to follow the best international practice(s) in academics. Shobhit University, Gangoh, Saharanpur has been notified by the Government of Uttar Pradesh vide Shobhit Vishwavidyalaya, Uttar Pradesh Adhiniyam, 2011 (U.P. Act No.3 of 2012) passed by Uttar Pradesh Legislature and assented by the H.E. Governor of Uttar Pradesh. The University is established under section 2(f) of the University Grant Commission (UGC) Act, 1956.

ABOUT ADARSH VIJENDRA INSTITUTE OF PHARMACEUTICAL SCIENCES (AVIPS)

Adarsh Vijendra Institute of Pharmaceutical Sciences (AVIPS), a constituent institution of Shobhit University is a premier institute of pharmacy in the northern region. The institute was established in the year 2006 by NICE society with an aim to provide quality education to the rural populace and meet the burgeoning demand of technically qualified personnel in various facets of Pharmaceutical sciences i.e. manufacturing, quality control, quality assurance, pharmaceutical marketing, research & development, academia, regulatory affairs and administration. The Institute is housed in a sprawling campus with an imposing and most conducive atmosphere with state of the ART infrastructure and instructional facilities. The institute offers diploma, graduate, post graduate and doctoral level programs in the field of pharmaceutical sciences and is approved by Pharmacy Council of India (PCI), New Delhi.

AIM & SCOPE OF THE CONFERENCE

Pharmacovigilance is the science and activities relating to the detection, assessment, understanding, and prevention of adverse effects of drugs or any other possible drug-related problems. Recently, its concerns have been widened to include herbals, traditional and complementary medicines, blood products, genetically modified product, radiopharmaceutical and biological. The purpose of pharmacovigilance is to detect, assess, and understand, and to prevent the adverse effects or any other possible drug-related problems, which are not only confined to chemical drugs, but extended to herbal, traditional, and complementary medicines, biological, vaccines, blood products, and medical devices. Several problems relate to the ways in which herbal medicines are named, perceived, sourced, and utilized. This may be because of differences in the use of nonorthodox drugs (e.g., herbal remedies) which may pose special toxicological problems, when used alone or in combination with other drugs. The purpose of pharmacovigilance is to detect, assess, and understand, and to prevent the adverse effects or any other possible drug-related problems, related to herbal, traditional, and complementary medicines. The field of Pharmacovigilance is growing rapidly and its development is making tremendous impacts in medical sciences and pharmaceuticals. The conference shall emphasize on recent advances in pharmacovigilance measures affecting drug development and industry output.
