

Shobhit University

University Training & Placement Centre
turning potential into reality

Dear Corporate Colleague,

As an experienced recruiter you must appreciate that no candidate is best suited to any given job profile and, finding the right candidates is one of the most onerous tasks. More often than not, every fresh recruit has to be tempered and honed before he could start contributing to the organization.

It makes taking Shobhit University engineering graduates-on-the-verge as no-obligation interns for a semester a better idea. You can teach them, guide them, mould them or re-organize them into the desired professional. This is a wonderful and effective way to find some eager and willing young minds. Under your tutelage they'll gain the icing of professional exposure on their cake of knowledge. And, you may get an exhilarating opportunity of Best Match Hiring, once the internship is completed. You'll also derive satisfaction from having moulded the kind of professionals you have always been looking for.

Interns/Trainees are our B. Tech Final Semester Students. Interns/Trainees are available from 18th January 2017 for a semester. The availability of Interns is from Agri-Informatics, Bio-Medical Engineering, Biotechnology, Computer Science & Engineering, Electrical, Electronics & Communication, Mechanical, Mechatronics branches.

I will highly appreciate if you may please forward this request to the person concerned dealing with Internship/Training Programs in your organization to discuss the possibilities of your patronage in this mutually reinforcing endeavor. This innovative approach is bound to trigger the much desired closer industry-academia ties.

Thanking You;

With sincere regards;

Professor Vijay Maheshwari
